We’d like your input!

If you have ideas, comments, or suggestions for how to address these issues, please send your comments and supporting technical justification to info@designlights.org.

The DLC is targeting three primary areas to address in the next V3.0 specification revision:

- **Interoperability** – How can the DLC encourage greater interoperability of systems utilizing the specification and associated QPL?

- **Energy Monitoring** – How can the DLC encourage or require the adoption and effective use of energy monitoring capability in networked lighting control systems?
